Codeblitz 2.0

ClipForge AI

"Chat a topic. Get an expert-level short video:
researched, verified, approved by you."

Team Name: Runtime Rebels

Team Members:

Shiv Dixit · Shreyash Tekriwal · Subham Gupta · Rahul Yadav

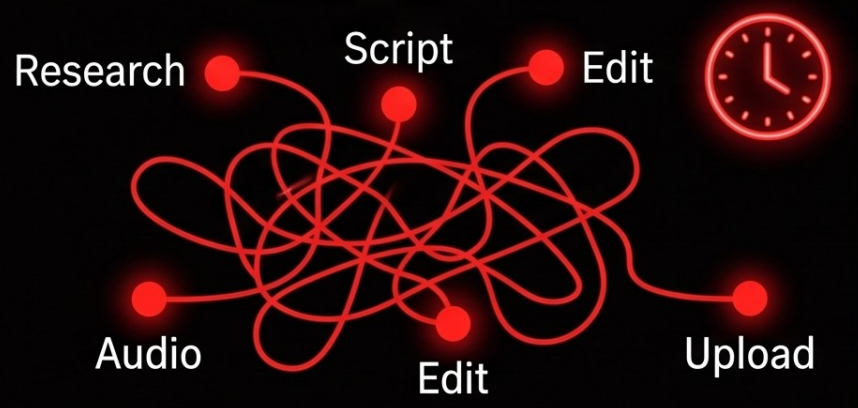

OSEN | craftora | IIElevenLabs

The Problem

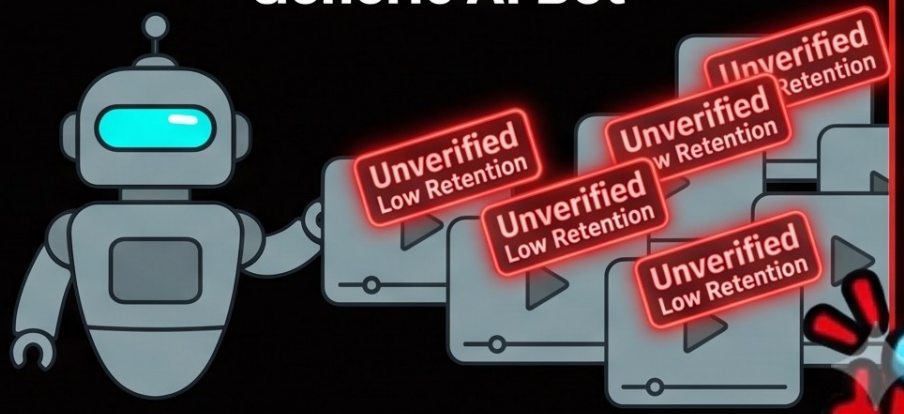

Short-form video commands attention, but authentic production is broken.

- **Time sink:** 3–5 hours per short for research, scriptwriting, voiceover, clip matching, and rendering.
- **The "AI Slop" crisis:** Instant one-click generators spit out generic, unverified hallucinations.
- **Platform penalties:** Algorithmic crackdowns on low-retention, templated synthetic media.
- **Missing context:** Existing tools generate blindly without asking "what is your unique angle?"

Manual Process

Generic AI Bot

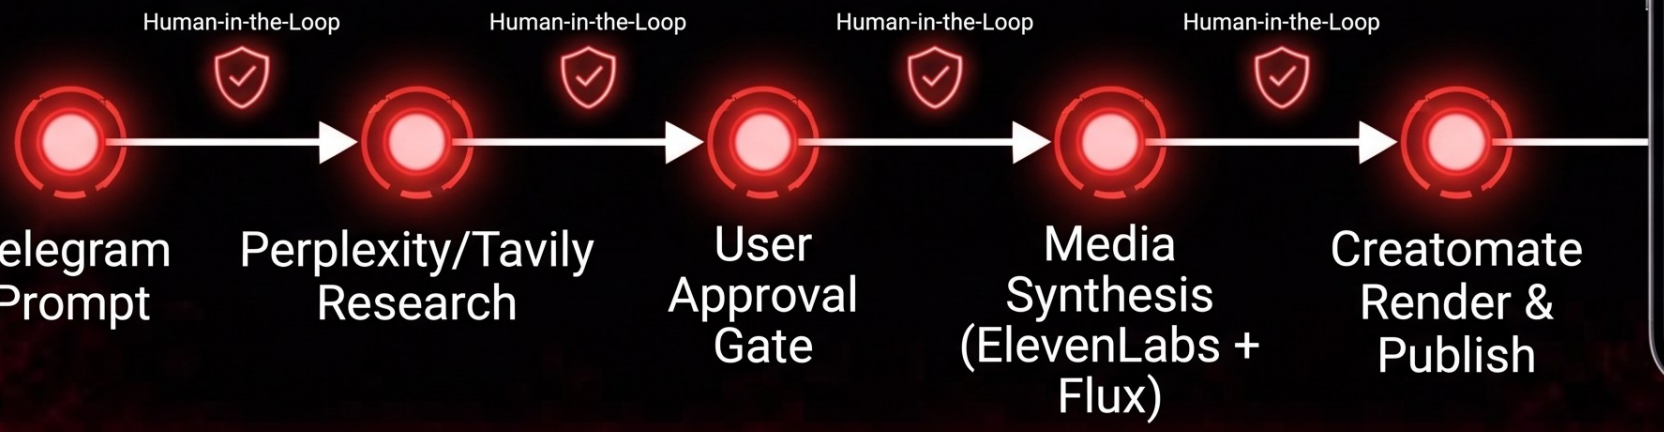

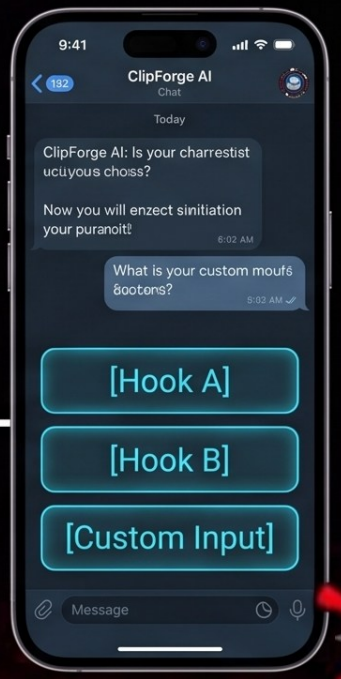

OSEN | craftora | IIElevenLabs

The Solution

ClipForge AI: A chat-native production studio that thinks like an executive producer before rendering a single frame.

Autonomous Pipeline: Telegram prompt → Deep web research → Dynamic interview questions → Human approval gates → Multi-engine generation → Instant YouTube publish.

OSEN | craftora | IIElevenLabs

Core Architecture & Features

Chat-First Workflow

Full control via Telegram bot (voice notes or text prompts).

Fact-Checking Engine

Web search retrieval grounds scripts in real citations.

Producer Interview

Agent asks clarifying questions and extracts your unique take.

Tiered Approval Gates

Approve topic angles, review still storyboards, and verify final cut.

Creator Identity

Persistent profiles preserving voice clone tone, pacing, visual aesthetics, and brand rules.

Retention Optimization

Generates dual hooks, dynamic auto-captions, and tracks post-upload engagement metrics.

OSEN | craftora | IIElevenLabs

Innovation

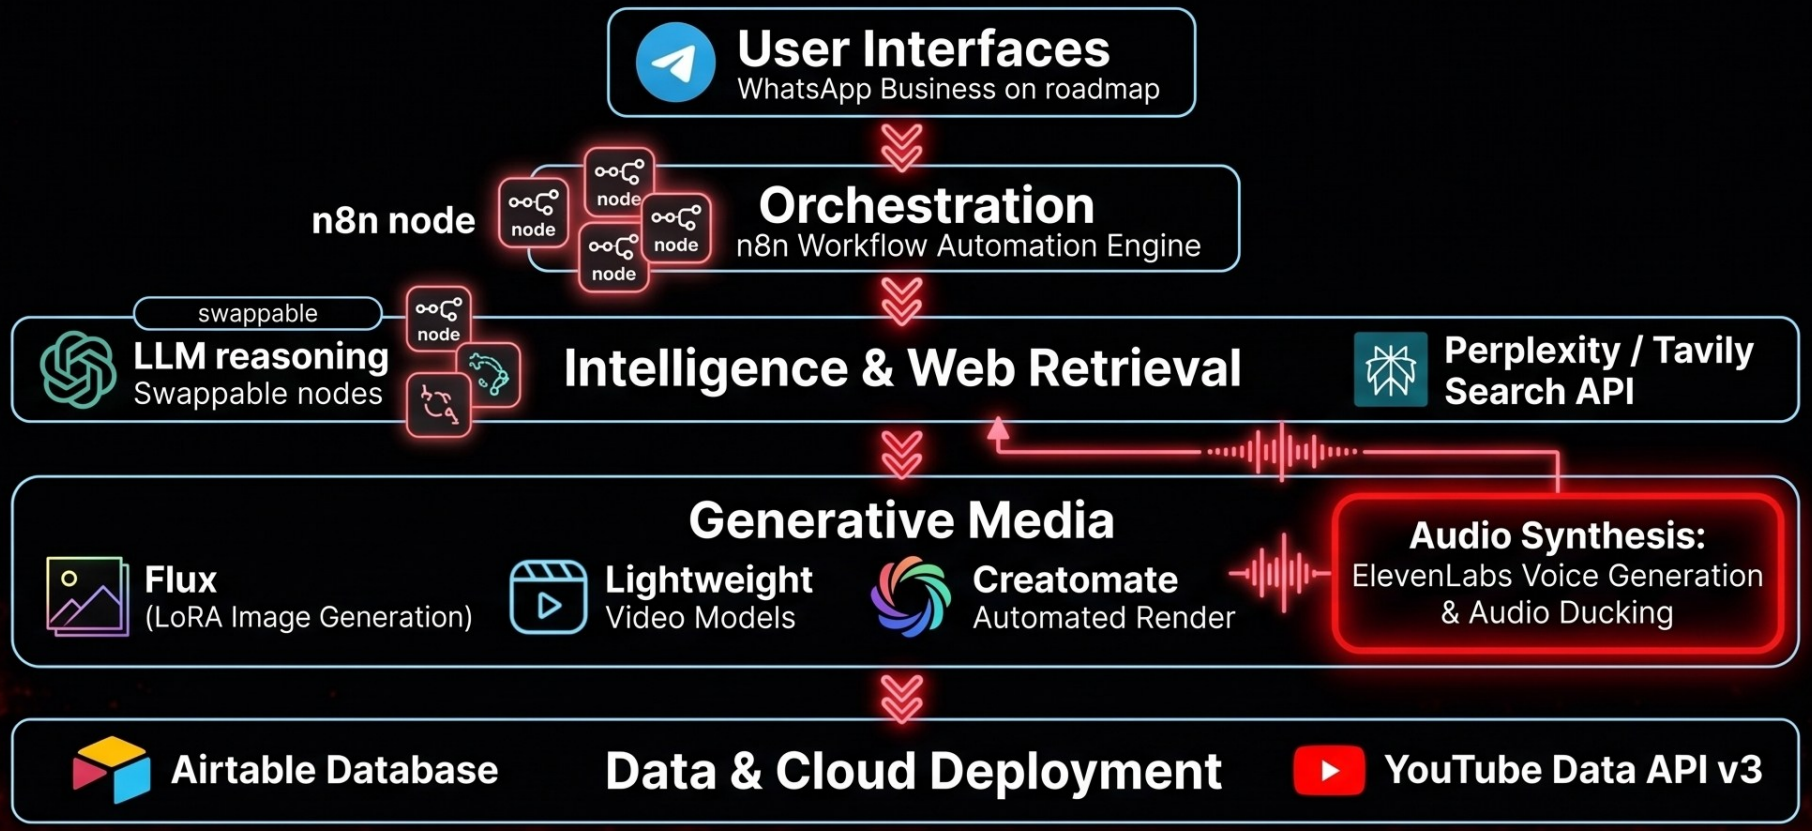

"Not just another video generator. An autonomous creative director."

Feature	Conventional AI Video Bots	ClipForge AI
Workflow	✗ Blind single prompt → video	✓ Interview-first, collaborative ideation
Accuracy	✗ Prone to hallucinations & fluff	✓ Verified web search with cited sources
User Control	✗ Zero preview, fire-and-forget	✓ 3 Approval gates (Angle, Storyboard, Video)
Cost Efficiency	✗ Paid video generation on every run	✓ Low-cost image previews prior to video rendering
Branding	✗ Identical generic templates	✓ Persistent creator profile & custom ElevenLabs voice
Feedback	✗ Static generation	✓ Analytics feedback loop into future prompts

From Idea To Impact</>

"We don't automate generic videos. We **automate expertise**—empowering anyone to turn an idea into trusted, high-retention content in minutes."

Pipeline Efficiency: 1 Chat Prompt → 1 Fact-Checked Video
Guaranteed Control: 3 Human-in-the-Loop Validation Steps
Zero Waste: Storyboard verification before paid video rendering
